What is the probability that both children are girls? In other words, we want to find the probability that both children are girls, given that the family has at least one daughter named Lilia. Here you can assume that if a child is a girl, her name will be Lilia with probability $\frac{1}{2}$ independently from other children's names.

Solved Problems Conditional Probability

Practice calculating conditional probability, that is, the probability that one event occurs given that another event has also occurred.

Calculating conditional probability (practice) | Khan Academy

1 Algebra 2 Mr. Gallo 11-4: Conditional Probability Conditional Probability Probability that one event will occur given that another event has occurred. Exists when two events are dependent Written $P(B|A)$ Read "the probability of event B, given event A" The first event restricts the original sample space For any two events A and B with $P(A) \neq 0$,
