

Arthroscopic Surgery Of The Knee

Arthroscopic Surgery Of The Knee

Knee arthroscopic surgery is a procedure performed through small incisions in the skin to repair injuries to tissues such as ligaments, cartilage, or bone within the knee joint area. The surgery is conducted with the aid of an arthroscope, which is a very small instrument guided by a lighted scope attached to a television monitor.

Knee Arthroscopic Surgery - procedure, recovery, blood ...

Arthroscopic ACL surgery is indicated when there is significant damage to the ACL. The ACL (anterior cruciate ligament) is one of a pair of ligaments in the middle of the knee joint, responsible for providing stability.. It is a very strong ligament but if it gets overstretched, the fibres start to tear.
