Emerging Pervasive And Ubiquitous Aspects Of Information Systems Cross Disciplinary Advancements

Emerging Pervasive And Ubiquitous Aspects

Ubiquitous computing (or "ubicomp") is a concept in software engineering and computer science where computing is made to appear anytime and everywhere. In contrast to desktop computing, ubiquitous computing can occur using any device, in any location, and in any format.A user interacts with the computer, which can exist in many different forms, including laptop computers, tablets and terminals ...

Ubiquitous computing - Wikipedia

Malware evolves through time capitalizing on new approaches and exploiting the flaws in the emerging technologies to avoid detection. We describe a number of new patterns of malware attacks present in the emerging technologies.

A survey of emerging threats in cybersecurity - ScienceDirect

Context awareness is a property of mobile devices that is defined complementarily to location awareness.Whereas location may determine how certain processes around a contributing device operate, context may be applied more flexibly with mobile users, especially with users of smart phones.Context awareness originated as a term from ubiquitous computing or as so-called pervasive computing which ...

Context awareness - Wikipedia

Track 3. Embedded Systems and IoT: All aspects of embedded systems, and IoT devices; Ubiquitous computing, and sensing; Cloud computing; Wireless sensor networks; RFID; Data collection, and information management; Digital control; Man-machine interaction; Plant automation systems, and optimal resource allocation; Factory of the future; IoT sensors for supply-chain management; Blockchain for ...

ICCD 2019 - iccd-conf.com

The Proceedings of the ACM on Interactive, Mobile, Wearable and Ubiquitous Technologies (IMWUT) is a premier journal series for research relevant to the post-PC era. Computing technology is becoming increasingly pervasive; embedded throughout the environment as well as in mobile devices, wearables, and the Internet of Things.

ACM Journals/Transactions

The Internet of Things (IoT), one of the fastest growing trends in computing according to Gartner (2014a), is expected to have a $14 billion economic impact by 2022 (Mahidhar and Schatsky, 2013).The IoT allows ubiquitous, unbounded connectivity of different types of devices at any time, within any place (Vermesan et al., 2011).This vision is made possible via the extensive use of sensors ...
