Horticulture - Plant Basics Connects users to information about plants including classification, structure, botany anatomy, photosynthesis and plant identification databases, as well as information about biomes, hardiness zones hydrological cycle and the history of horticulture.

Horticulture and Landscape Design Careers and Resources

Landscape archaeology or landscape history is the study of the way in which humanity has changed the physical appearance of the environment - both present and past. Landscape generally refers to both natural environments and environments constructed by human beings. Natural landscapes are considered to be environments that have not been altered by humans in any shape or form.
