In chaos theory, the butterfly effect is the sensitive dependence on initial conditions in which a small change in one state of a deterministic nonlinear system can result in large differences in a later state.. The term, closely associated with the work of Edward Lorenz, is derived from the metaphorical example of the details of a tornado (the exact time of formation, the exact path taken ...

Chickens are crowd followers. If a chicken sees a bunch of chickens running across the chicken yard, he will take off after them. It doesn't matter that he doesn't know where they are going or why they are going there. He follows along because he doesn't want to miss out on anything the majority is doing.

Appearances are deceiving in the horse world and determining a herd's hierarchy can be as tricky as threading a needle with barbed wire. Full of illusions, the complexities of the pecking order can often throw the casual observer for a loop. So how can you tell if Ol' Dobbin is a social butterfly or ...

Was wondering if anyone has installed an AOA indicator for a certified PA18, or has experience using an AOA system for landing/takeoff. Thought it might be useful for maximizing performance without the risk of stalling inadvertently. I see a lot of wing drops and hard landings at the STOL contests...
