A total of 47 eWOM communication articles published between 2000 and 2010 were identified. Research on the impact of eWOM communication can be classified into market-level analysis and individual-level analysis. In this review, 47% (22 out of 47 articles) of the articles adopted the market-level approach, while 53% (25 out of 47 articles) focused on the individual-level analysis (see Fig. 1).

In signal processing and statistics, a window function (also known as an apodization function or tapering function) is a mathematical function that is zero-valued outside of some chosen interval, normally symmetric around the middle of the interval, usually near a maximum in the middle, and usually tapering away from the middle. Mathematically, when another function or waveform/data-sequence is ...
