

Term Mathematical Definition

Term Mathematical Definition

In Algebra a term is either a single number or variable, or numbers and variables multiplied together. Terms are separated by + or – signs.

Term Definition (Illustrated Mathematics Dictionary)

Mean - The mean is the same as the average. Add up the series of numbers and divide the sum by the number of values. Median - The Median is the 'middle value' in your list or series of numbers. When the totals of the list are odd, the median is the middle entry in the list after sorting the list into increasing order.

Math Glossary: Mathematics Terms and Definitions

A term denotes a mathematical object from the domain of discourse. A constant c denotes a named object from that domain, a variable x ranges over the objects in that domain, and an n -ary function f maps n -tuples of objects to objects.
