The Inflation Crisis And How

Inflation is a sustained increase in the general price level of goods and services in an economy over a period of time. When the general price level rises, each unit of currency buys fewer goods and services; consequently, inflation reflects a reduction in the purchasing power per unit of money – a loss of real value in the medium of exchange and unit of account within the economy.

The U.S. inflation rate by year is the percent change in prices from one year to the next, or year-over-year. The inflation rate responds to each phase of the business cycle. The first phase is expansion. That's when growth is positive, with healthy 2% inflation. As the economy expands beyond 3% percent growth, it creates asset bubbles. It creates the second phase, which is the peak.
